Promoting Independence
Hackney Adult Social Care Services
Commitment Statement
Social Care for Adults in Hackney – Fairness, Equity and Independence

Hackney Council is committed to delivering the highest quality services to residents who have care or support needs. The Council is committed to working with its partners (particularly the voluntary sector, local providers of care and the NHS) to develop services for residents that help people live as independently as possible with minimal interference. We will develop a fair system of social care where the resources that are offered relate to the level of assessed needs a person might have and where their contribution towards the costs of that care clearly relates to their ability to pay. Fairness, Equity and Independence will be at the heart of social care in Hackney.

We have established a structured and fair service system which works to make the very best use of the limited resources that we have.

We will promote health and well being through the effective development of universal services, ensuring that we enable ‘something for everyone’ through provision of clear information about facilities and activities in their local community.

We will give priority in our future service delivery to helping people recover, recuperate, and rehabilitate so that they are able to live as independently as possible.

We will ensure that all staff understand how to work with service users in ways that promote their independence, ensure their safety and support their recovery.

Community Based Solutions
We will always aim to help people continue to live in their neighbourhood and community, where this is feasible and affordable. We will seek to reduce admissions of people to residential care where we can safely meet their assessed needs in a community based setting. To this end, we will no longer admit any older person direct from a hospital bed to a residential care home without a longer term assessment. We will always ensure that the assessment is offering more than just a response to a current crisis and that each person is getting the right health, housing and other support alongside their social care. If a person is now in residential care and an assessment indicates that they may be able to live in the community we will give them the opportunity to try that option.

We will ensure that the interventions we offer people will focus on how we can promote their independence. This means we will always seek to use community based solutions including assistive technology where these will enable people to remain safe and meet their care needs. All the domiciliary care that we offer will be based on the principles of re-ablement. This means we will work with people to see how we can assist them in doing more for themselves. Over time we would expect some packages of care to decrease as people meet their own defined outcomes in achieving greater independence.

We will use residential care where we have explored other options and have found that this is the only way to meet someone’s care and support needs in a safe way. In many cases, people who have the most complex needs also have longer term health conditions which also mean they may be entitled to additional personal health budgets to meet their needs.
Resources focused on critical and substantial needs
Our interventions will offer the right level of support according to a person’s assessed needs. Assessments will be carried out over a reasonable period of time to ensure that we have not made long-term decisions about people before we have had a chance to work with them through a recovery or recuperative plan.

We recognise that the solutions that many people have to meet their care needs can be found within their own families, their communities and within themselves. We will work with each person and their network to find these solutions. Where people have lost their support networks we will work in partnership to rebuild them. We will encourage our service users, our partners and our staff to help find creative solutions to meet the outcomes that they wish to achieve. We will always look for solutions that offer value for money (quality in delivering the agreed outcomes against the cost to the public purse).

Empowering Risk Management
The essence of our work will be to ensure that we are balancing risk to empower and safeguard our service users. We will never take responsibility away from someone unless we have a court order, which indicates that the person does not have capacity to manage their own affairs. If we are concerned about the decisions a person is making for themselves, but they still have capacity to make a decision, then we will talk through the risks and work with them to ensure that, as far as possible, they understand the risks they are taking. This may mean that some people make the wrong decisions but that will be their choice based on as full an understanding as possible of the risks. We will look to offer guidance and support but not to take over control.

Work with Providers
We will work with our providers and with our in-house team to build a philosophy of care that focuses on outcomes – where service users can determine with their assessors and their providers the aspirations they have from the service. We will ensure that people have a suitable level of service (preferably through a Direct Payment) that will meet their currently assessed needs and support their objectives towards independence.

We will always work with those who are providing services to ensure that they are delivering value for money (including those services provided by the council) from the public purse; we will look to achieve this in partnership through a dialogue between service users, providers and the council. We will set performance contracts for all our services that are provided or commissioned by Hackney Council and these will focus on the desired outcomes for the service users. We will invest in providers who can demonstrate creative, innovative service provision and disinvest in providers who do not provide a person centred, value for money service.

We will develop community based services that encourage good neighbourliness, assist in meeting the challenges of social isolation and social exclusion as well as services that enable people to take more control over their own lives. We will support user-led organisations, social enterprises and other groups who can meet our aspirations for social care.

The council as a main employer in the area will take a lead by demonstrating that it is an employer of choice for disabled people and people with a history of mental illness. We will also work with other public sector bodies, our contractors and companies based in Hackney to offer real opportunities for people whose disability may have traditionally disadvantaged them within the employment markets.
Partnership with Health Professionals
We need to continue to develop an integrated and outcome-focused approach to our work with all our health partners, particularly the City and Hackney Clinical Commissioning Group. We need to ensure that we share common goals in assisting people to remain independent in their own homes. This means that where possible we will have shared health and social care assessments and a single plan that will help people to retain independence in the community. For example, the interventions from occupational therapy, physiotherapy and social care input detailed in one support plan.

We will work with NHS partners to develop the expert patient programmes which enable people to take more responsibility for how they manage their longer term conditions. This will both help them as the patient and reduce the cost to the council and the NHS.

One of the principles that we will develop with NHS partners is to ensure that any assessments made, allow the person to have a period of treatment and support to enable them to make a full recovery before we make a longer term plan for their care. This will particularly apply to older people in hospital (as above).

With the consent of the service user, we will also share details of care packages and review of those packages with their GP so that the GP is clearly aware of the interventions in place to promote independence and maintain the wellbeing of their patient.

Spending Public Money Wisely
With the combination of growing demand and reduced resources available to the council, we need to ensure that money is spent in a fair and equitable way. It is possible that some of our current service users and their carers may see a reduction in the amount of money that is available to them. The decision as to how any reduced money will be used will always be done in full consultation with the user and their carers. In particular we will manage reductions in a clear, transparent and negotiated way.

We need to reduce some historical levels of service provided to service users which are greater than the associated levels of assessed need. Whilst ensuring fair and equitable services means we cannot delay this process unduly, we will take a sensitive and understanding approach.

We will focus on achieving value for money for every service that we procure on behalf of service users. We will focus on finding the most affordable price that can deliver us the degree of quality that our service users require.

In a world of personal budgets we will take a balanced view between procuring services on behalf of local people to achieve good value mainly through framework agreements and through encouraging service users to develop their own creative solutions to meeting their needs.

We will ensure that there are services available for service users and their carers to meet their needs within the resources that will be made available to them through personal budgets. We will work with local and regional providers of care to support the delivery of this policy.

Our commissioning strategy will be developed jointly with our health partners and in consultation with our service users and carers and we will learn lessons from elsewhere. We will build models of care and support which help us to deliver the outcomes that we have outlined above.
Knowledgeable and Informed Workforce
We will develop a workforce who can work within this vision. This includes staff both within the council and those who work for organisations who provide services on our behalf. We will ensure that all staff understand how to work with service users in ways that promote their independence and support their recovery. We will support staff to work within multi-disciplinary teams. We will help staff develop their practice in ways which will assist them to empower our service users to make the best use of their personal budgets to ensure a relentless focus on promoting independence rather than creating dependency.

We will examine our policies to ensure that we are fulfilling our statutory duty to promote equality of opportunity and to challenge inequalities in adult social care. Every policy area will be accompanied by an Equality Impact Assessment.

Valuing Carers
Many people with social care needs will have these met mainly through the carers with whom they live. Recognising there may be increased responsibilities for family carers, the council will develop a compact with each carer as to how we can best share the responsibility for delivering the care a person needs. We will ensure that carers are informed of their right to have a carers assessment which they can have either together with their cared for person or separately.

The services we offer

• We will continue to develop housing schemes with partners with suitably adapted accommodation and to offer care and support in the community wherever that is feasible to meet someone’s needs (as opposed to residential care).

• In an age of digital technology we will continue to explore how new technological solutions, such as Telecare can give citizens better care, ensure their safety and assist our staff in carrying out their daily tasks.

• We will expect that younger adults who have sufficient ability are supported into work environments. We will support younger adults and their families through the move from children’s services into the adult world. We will support young carers to ensure that their needs are also being met.

• We will use personal budgets to ensure that the people requiring longer term care can take as much control over their lives as their needs allow. We will continue to increase the number of people who are in receipt of a direct payment.

• Many people with social care needs will have these met mainly through the carers with whom they live. The council will develop a compact with each carer as to how we can best share the responsibility for delivering the care a person needs.

• Our charging policies will reflect the guidance given to us from Central Government. We apply a means tested approach. We do not offer any subsidies to service users for services we provide or those we commission when contributions are made from personal budgets. Services to carers are currently provided free of charge.
• We will focus on achieving value for money for every service that we procure, finding the most affordable price that can deliver us the degree of quality that our service users require to deliver their specified outcomes.

• We will develop our commissioning strategy with a wide range of stakeholders including health partners, providers, community groups, users and carers taking a whole systems approach to the design and development of services. We will develop a market place for service provision that meets the needs of a vibrant diverse community.

• We will ensure that all council departments strive to ensure that their policies promote good services for people who may have care and support needs e.g. we will look to ensure our street scene can be used by wheelchair users and that our Library Services have books in large print and talking books to assist blind and partially sighted residents.

• We will ensure that we optimise the full value of universal services such as leisure centres, parks and adult education services to deliver services of our health and adult social care system.

The outcomes we are seeking

• We will ensure our policies fulfil our statutory duty to promote equality of opportunity, maintain parity in access to services and challenge inequalities in adult social care.

• We expect to see a reduction in the number of people we are directly helping and we expect to see an increase in the number of people being helped within their communities with safeguarding arrangements as appropriate.

• We expect to see more people living healthy, happy and more fulfilling lives in their own home.

• We expect to see a reduction in the number of people who will have to be admitted to residential care to meet their assessed needs and more people will be using personal budgets to meet their needs in the community.

• We expect to see an increase in the number of people successfully completing recovery and recuperation programmes and having access to Telecare and good housing options to meet their longer term needs.
