Social Distancing

Coronavirus is spreading very quickly between people.

So it is important for everyone to stop seeing their friends and family that do not live with them to keep them safe.

It is ok to go out once a day to open spaces for some fresh air with my family.

I need to keep a 2 metres distance from other people.
I will not go to places that have lots of people, like pubs and restaurants.

It is ok to not see my friends and some of my family face-to-face for now, I can talk to them through Whatsapp and facetime.

I will see my friends and family again when coronavirus is under control.
