

## How to search the Coventry Adult Social Care and Communities Directory: a worked example to help you make the most of the resource.

- Looking for a residential care home in Earlsdon.

If we put “**residential care home**” in the search keywords, because the phrase is in **quotation marks** then the directory **will only find records which contain this exact phrase**. (There would be a lot more records that contain **any** of the words residential, care or home. If you just entered care home in the keywords box you would get 10 pages of results!)

For the search location we enter Earlsdon. (You can also enter a postcode for the location.)

### Search Results

This search results in a list of 6 residential care homes and information about Coventry City Council Housing Options. Please see the screenshot below where the results have been listed by **distance** from Earlsdon. On each care home result there is a **light blue box** showing the actual distance from Earlsdon. If you wanted to narrow down the search to residential care homes within a certain distance of Earlsdon you can also set the **max distance** filter box to either 1, 5 or 10 miles. As well as sorting by distance you can sort the results **by name**, that is alphabetically, or by what the directory considers to be the **best match**: this will prioritise results which have your search words in the record titles.

If you are interested in particular care homes you can click on the **green button** “Add to my shortlist button” to save the result you may want to refer to later. Alternatively, you can click on the **green button** “Add this page of results to My Shortlist” near the top of the page to **add all** the results on this page. These will then be saved on your My Shortlist, which you can access when you want by clicking on the **yellow** My Shortlist button towards top right of the page.

**Lammas House Residential Care Home**

On the **left hand column** under **search results** there are various options for filtering the results. For example, if you were looking for a care home to look after someone with dementia then clicking the dementia box under the “Supporting people with:” heading would list the any of the residential care homes which state they support people with dementia.

### Broadening the search

Some care homes may not have used the phrase “residential care home” to describe themselves, so we could broaden our search by putting “care home” as the keyword search phrase. This generates a lot more results- on 4 pages. Some of these may be less relevant, but it will also include more care homes than the narrower previous search. It may be more useful to sort the results by “Best match” rather than “Distance” as the directory will then list records with “care home” in the titles first.

This broader search may also be better for finding the specialist provision which you want. For example, it generates 11 search results relevant to Supporting people with Dementia, rather than the single result in the previous search- as highlighted in the screenshot below.

024 7644 2209 [Add to My Shortlist](#)

## Searching by words rather than exact phrases

The more precision you give will make the search results more relevant. For example, if you were interested in line dancing, putting line dance in your search will generate 2 pages of relevant results in the City. If you were just put dance in as the keyword you would get 10 pages of results with all sorts of dance types listed!

## Finding things using the icons

If you are uncertain what you want to search for then why not explore what is in the directory first by clicking on the blue icons on the directory home page to see what is available under headings of interest to you (see screenshot below.)
