The NAS EarlyBird Pre-School Programme offers parents opportunities to learn about how Autism/ Autistic Spectrum affects their child and how they can help their child.

- It is a three month programme working with up to six families at a time.
- Parents/carers join together for eight group sessions which are held locally on the same day each week. Each session lasts for three hours and involves taught input, discussions and video input.
- It involves families being visited regularly in their homes, both prior to and throughout the programme itself.
- The programme is run by local professionals who have all been trained at the NAS EarlyBird Centre in South Yorkshire.

The NAS EarlyBird Programme works in partnership to help parents to:

- understand their child's autistic spectrum;
- develop communication with their child;
- apply practical strategies to manage their child's behaviour.

Potential Programme Information:

Where possible, programmes are delivered in locations when there is a demand (4 to 6 families in an area). Information Meetings are held locally prior to a programme starting.

Lincoln  Autumn 2013
Louth  Autumn 2013
Spalding  Autumn 2013 or Spring 2014
