

This service is open to pupils who currently access Home to School Transport Service to school either through coach or taxi.

Independent Travel Training can be a daunting process for Parents and Carers, but ITT is centred around the pupil with parent/carers wishes and feelings taken into account before training starts.

Independent Travel Training is provided to give the pupils more freedom and independence for school life, and accessing the wider world of work in later years.

Current School Transport will never be removed until the young person is fully capable of Independent Travel Training.

Please contact me on the details below for more info.

The ITT Process

- Referral placed with transport team via email or telephone call.
- After parental permission has been given, (This often involves a home visit to discuss concerns if any) an appointment is made with school and a small assessment is undertaken with a teaching assistant/ support worker.

- If pupil ready to train, then necessary risk and medical assessments are carried out.
- Training will begin, and daily records maintained. (These can be seen by Professionals/Parents at anytime)
- However...If the is pupil not ready to train, a different approach will be taken with the pupil will be discussed with school and parents/carers.

- At the end of the training a free bus pass will be provided to all pupils who pass training and certificates will be issued as a memento!

Please remember !!

No child will be trained unless Parent/Carer is completely happy for training to take place!!! And ALL Training is run at pupils pace, its not a race, its a life skill.
