Your **school** health service...

promotes and supports the health and well-being of all school aged children.

The team includes qualified specialist nurses and nursery nurses who have a special interest in working with young people alongside school staff, other professionals, and parents and carers.

The school health service also works outside of schools in the community with families and with children not in mainstream education.

What does a **school nurse** do?

- gives health advice and information to students
- helps children in need
- provides a private and confidential service
- supports parents with their children's health
- makes referrals to specialists
- promotes healthy lifestyle options
- offers immunisations
- supports children with special needs and complex medical needs
